

Concentrated Global Growth Equity Strategy

December 31, 2021

Objective

The Concentrated Global Growth Equity Strategy seeks long term compounding by focusing its investments into a concentrated portfolio of the most dynamic global growth opportunities.

Why Invest

- Clearly defined, transparent, and consistent process
- Driven by fundamentals, supported by evidence
- Active risk management with disciplined portfolio construction
- Advancing positive change through active engagement

Portfolio Managers

Investing Ahead of the Curve

Commentary

During the fourth quarter 2021, the Axiom Concentrated Global Growth Equity Strategy ("Strategy") underperformed the MSCI ACWI Index ("Index") net of fees. The Strategy has outperformed the Index on a net of fees basis over the year-to-date, 1-year, 3-year, 5-year, and since inception periods.

Growth outperformed value globally during the fourth quarter, the second quarter in a row. Value did, however, show renewed strength at the very end of the year on concerns about headline inflation. The policy driven reflationary tailwinds which fueled a powerful off and on value rally beginning with the announcement of vaccines at the end of 2020 might finally run out of gas during the first half of 2022. The now universal inflation concerns seem likely to crest in the coming months as the pace of global recovery moderates and supply chains reopen. The JPM Global Composite PMI peaked in late last spring at 54.8 and, since mid-year, world real GDP growth forecasts have been cut by -20 basis points to 5.8% for 2021 and by -10 basis points to 4.4% for 2022. Challenges including Delta, Omicron and other COVID-19 variants, the Chinese real estate credit crisis, gathering fiscal headwinds, and ongoing monetary policy tightening all represent notable downside risks to the global growth outlook as 2022 advances. Conversely, strong consumer balance sheets and employment trends, if sustained, provide potential upside. Regarding inflation, average expected world CPI rose by over +100 basis points throughout the course of the year to end at 3.9% for both 2021 and 2022. In the US, inflation is now expected to peak at over 7%. Recently, however, under recognized signs of inflation peaking have begun to emerge, just as the US Fed and investor consensus have belatedly backed away from the 'transitory' language. For instance, in the last two months, the Chinese PMI input price index, which tends to lead US inflation by a quarter, has fallen sharply from 72 to 48 and, in December, nearly all of US Federal Reserve regional price surveys showed a decline as did the US ISM price index. Moreover, China and Vietnam, among the first larger countries globally to publish monthly inflation, both showed notable inflation drops in December. In a few months, commodity input prices, which have been important contributors to recent inflationary pressures will begin to anniversary last year's run-up. Finally, ongoing channel inventory builds will potentially accelerate as supply chain bottlenecks ease post Omicron in a few months, resulting in potential unexpected goods price deflation if demand slows in 2022. The balance of investors now expect four US Fed rate hikes in 2022. While some analysts worry principally about a policy error by the generally dovish monetary authorities, an equal policy risk would seem to be additional inflationary fiscal stimulus or punitive anti-growth tax hikes. As always, geopolitical tensions remain a wild card. On balance, conditions seem unlikely to provide sustained reflationary tailwinds for value stocks and, to the contrary, could be increasingly favorable for growth stocks as 2022 advances, especially if Fed rate hikes prove to already be fully discounted. Even if growth and inflation slow a little, anything near the forecast 8%+ nominal growth (4.4% real + 3.9% inflation) should support further stock market gains. For Axiom Investors, a more moderate economic outlook with fewer inflation and rate pressures

over the course of 2022 should increasingly favor Axiom's dynamic growth stocks as our investments tend to offer higher structural growth and profitability and are less sensitive to a slower nominal growth rate. That said, we will continue to intensively monitor economic data globally. If reflation proves to be more durable, we expect to add to our more cyclical dynamic growth stocks including in the industrial, consumer, and financial sectors.

Looking back on 2021, Axiom enhanced investor outcomes despite the strong headwinds to growth investing, primarily impacting the first half of the year. For the full year 2021, the MSCI All Country Value Index outperformed MSCI All Country Growth Index by over 300 basis points. In developed markets, the spread for the year was only about 100 basis points in favor of value. However, in emerging markets, value led growth by over 1250 basis points. Unlike in developed markets, EM growth investing headwinds persisted into the fourth quarter largely due to policy headwinds in China.

The best performing sectors on a relative basis during the fourth quarter were industrials, led by strong performance from Trex and Epiroc, followed by Consumer Discretionary, due to LVMH, and Energy, due to underweight exposure. Health Care, Communication Services, and Information Technology were the largest relative detractors for the quarter.

The largest contributing country on a relative basis was Japan, due to underweight exposure, followed by China, and Sweden, again due to strong performance from Epiroc. The United States was the largest detracting country for the quarter, followed by Singapore and the Netherlands.

From an individual stock perspective, the Strategy's best relative contributors this quarter included NVIDIA, Microsoft, Trex, Epiroc, and LVMH. The largest detractors on a relative basis were Sea Ltd, Apple, Adobe, Adyen, and PayPal.

Axiom's structural case for growth investing, underpinned by our 4D's (Demographics, Debt, Deglobalization and Disruption), seems likely to reassert itself as 2022 advances and we pass beyond the current inflation scare. The policy driven reflationary tailwinds that temporarily boosted value stocks in 2021 appear likely to fade during 2022 as policy becomes an increasing headwind and both supply chain and input price issues resolve. We will continue to focus on stock selection as it seems likely that an ever-narrower subset of companies will be positioned to capture the available growth opportunities. Axiom's differentiated, active, information intensive security selection and monitoring process will help us remain objective and fact-based as we seek out the most compelling dynamic growth opportunities to stay ahead of the curve in the year ahead.

The information presented is not definitive investment advice, should not be relied on as such, and should not be viewed as a recommendation by Axiom. The securities presented are not representative of all of the securities purchased, sold or held for advisory clients, and it should not be assumed that investment in the securities identified was or will be profitable.

Firm Compliance Statement: Axiom International Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to September 30, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Concentrated Global Growth Equity composite has had a performance examination for the periods December 3, 2014 to September 30, 2021. The verification and performance examination reports are available upon request.

Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom International Investors, LLC (the "Firm") is a registered investment advisor under the Investment Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Concentrated Global Growth Equity strategy (the "Composite") is designed for investors who seek to invest in a broadly diversified portfolio of international equities. Portfolios are invested in companies within the United States and throughout the world. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional concentrated global growth style fee-paying, discretionary equity accounts, regardless of asset size. The Composite was initiated and created in December 2014. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled funds and performance results are available upon request.

Benchmark Description: The benchmark is the MSCI All Country World index, which is designed to measure the equity market performance of developed and emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholdings taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Prior to May 2017, actual fees were used to calculate net of fee performance. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

Investors should read applicable materials carefully before making a decision to invest.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be discretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willingness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investor could lose or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy.

Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including: changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
