Investing Ahead of the Curve

Commentary

During the first quarter 2022, the Axiom Emerging Markets World Equity Strategy ("Strategy") underperformed the MSCI EM Index ("Index") net of fees. The Strategy has outperformed the Index on a net of fees basis over 3-year, 5-year and since inception periods.

This quarter, the MSCI EM Growth Index underperformed the MSCI EM Value Index by -7%. This was the second worst quarter for emerging markets growth relative to value in the past 25 years. Historically, such pronounced market rotations have often been followed by periods of growth stock recovery. Earnings remained resilient across Axiom's holdings, with the preponderance of the portfolio seeing forecast upgrades. As a result, the price correction left Axiom's holdings at historically attractive levels for longer-term performance. For example, the average PE in Axiom's Emerging Market World Strategy fell from nearly 20 at the start of the quarter to approximately 15 by the end while the average forecast earnings growth rate accelerated from just under 24% to just under 30% bringing the PEG ratio down from 0.8 to 0.5, an attractive and below-index level. We saw directionally similar movements across other Axiom strategies. In addition to growth-stock multiple compression, the underlying sector performance of the index return also presented a challenge. For example, financials was the best performing sector in the Index closely followed by materials, particularly metals and mining. Both sectors benefited from elevated global inflation and the materials sector was further boosted by the supply shock which resulted from the Russian invasion of Ukraine. The worst performing sectors included many of the 'growthier' parts of the global economy such as consumer discretionary, health care, and information technology. Many of Axiom's challenging stocks this quarter were longer term contributors that suffered a price correction despite continued earnings growth. The investment team collaborated intensively to re-underwrite existing investments while making prudent adjustments to portfolio holdings to manage risk, capture opportunities, and reflect evolving market conditions.

The top performing sector for the Strategy on a relative basis during the first quarter was consumer staples, led by Walmart de Mexico. Detracting from performance for the quarter was the Strategy's underweight position in Brazilian banks within the financial sector and stock selection in information technology.

From a country perspective, Russia was the highest contributing country on a relative basis due to Axiom's underweight in advance of the invasion; the Strategy sold down exposure to 0%. Also contributing positively was the Strategy's overweight to Mexico, led by stocks Grupo Mexico, Grupo Financiero Banorte, and Walmart de Mexico. Detracting from performance for the quarter was our stock selection in Taiwan, mainly driven by the underperformance of a few technology stocks, and our underweight to Brazil.

From an individual stock perspective, the best relative contributors for the quarter were Al Rajhi Bank of Saudi Arabia, Walmart de Mexico, PTT Exploration & Production of Thailand, and Grupo Financiero Banorte. The largest detractors on a relative basis were Lukoil, before selling to zero, Taiwan Semiconductor, and Silergy.

Global equities have rapidly adjusted to reflect challenging current macroeconomic conditions creating opportunities in public markets for longer-term investors. While recent market turbulence is unsettling, it is notable that the S&P 500, for which data is available, rose during all seven Fed hiking cycles since 1975, gaining over 16% on average. The median Fed tightening cycle lasted 15 months with nine hikes for a median benchmark rate increase of 3.25%, roughly in line with current market expectations for this cycle. The Fed joined the global monetary tightening cycle, which started over one year ago in emerging markets, as global inflation concerns intensified during the quarter largely because of the energy and commodity supply shocks associated with the Russian invasion of Ukraine. These supply shocks combined with tight global labor markets and the residual impacts of COVID more than offset recent signs of improvements in global supply chains and evidence of rising wholesale channel inventories. While current growth remains healthy with especially strong labor and housing markets as well as tailwinds from re-opening and residual stimulus, investors are increasingly factoring in the risk of a recession. The widely followed 2-year to 10-year interest rate spreads recently briefly inverted anticipating a possible recession in one to two years. Again, as with the Fed tightening, these concerns might be creating public market opportunities for longer-term investors. Following all yield curve inversions since 1975, markets rose over 70% of the time gaining 8% on average from the first day of inversion to the end of the subsequent recession, again using the S&P 500 as a reference given the long-term data availability. During the past few Fed tightening cycles growth stocks on balance outperformed but earlier cycles sometimes favored value stocks. As we have for over 25 years, the team at Axiom will continue to navigate challenging markets by seeking out attractive dynamic growth investment opportunities, implementing our disciplined risk-aware portfolio construction, and focusing on remaining value-added long-term stewards of capital.

The information presented is not definitive investment advice, should not be relied on as such, and should not be viewed as a recommendation by Axiom. The securities presented are not representative of all of the securities purchased, sold or held for advisory clients, and it should not be assumed that investment in the securities identified was or will be profitable.

Firm compliance statement: Axiom Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to December 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Emerging Markets World Equity composite has had a performance examination for the periods July 1, 2014 to December 31, 2021. The verification and performance examination reports are available upon request.

Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom Investors, LLC (the "Firm") is a registered investment advisor under the Investment Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Emerging Markets World Equity strategy (the "Composite") is designed for investors who seek to invest in a broadly diversified portfolio of emerging market equities. Portfolios are invested in the full range of global emerging markets within all capitalization sizes. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional emerging markets world style fee-paying, discretionary equity accounts, regardless of asset size. The Composite was initiated and created in July 2014. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled funds and performance results are available upon request. As of September 30, 2016, the Emerging Markets All Cap strategy (the "Composite") has been renamed the Emerging Markets World Equity composite.

Benchmark Description: The benchmark is the MSCI Emerging Markets index, which is designed to measure the equity market performance in the global emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholding taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Significant Cash Flow Policy: Accounts with a cash flow greater than 20% of the portfolio market value are excluded for the month effective July 31, 2018.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends. The fee schedule for the Axiom Emerging Markets World Equity Fund, which is included in the Emerging Markets World Equity Composite is listed above. The total expense ratio as of December 31, 2020 was 0.96%.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

Investors should read applicable materials carefully before making a decision to invest.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be discretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willingness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investor could lose or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy. Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
