

Emerging Markets World Equity Strategy

June 30, 2022

Objectives

The Emerging Markets World Equity Strategy seeks long term compounding by focusing its investments in emerging market countries or companies that derive a majority of their revenues or assets from emerging market countries.

Why Invest

- Clearly defined, transparent, and consistent process
- Driven by fundamentals, supported by evidence
- Active risk management with disciplined portfolio construction
- Advancing positive change through active engagement

Investing Ahead of the Curve

Commentary

During the second quarter 2022, the Axiom Emerging Markets World Equity Strategy ("Strategy") underperformed MSCI EM Index ("Index") net of fees. The Strategy has outperformed the Index on a net of fees basis over 3-year, 5-year, and since inception periods.

The outlook for growth stocks is improving after several very challenging quarters. During the second quarter, specifically, the MSCI EM Growth Index fell just under -12%, underperforming value by -1 percentage point, bringing the year-to-date growth decline to just under -21%, or -7 percentage points below value. Despite this sharp recent correction, global growth markets have strongly outperformed value over the 3, 5, 7, and 10-year periods, achieving index returns in the +2% to +5% range over those time periods. We believe the 4D's secular tailwinds to growth stock investing (debt, demographics, deglobalization and disruption) are poised to reassert themselves and the recent growth stock correction offers an opportunity for longer-term investors. Axiom's dynamic growth portfolio has been negatively impacted by the severe headwinds to growth investing recently but remains solidly ahead of benchmarks over longer time periods. The policy driven inflation and cyclical tailwinds that hurt growth stocks and fueled the recent value stock rally are showing signs of peaking as the Fed has moved more aggressively to tighten monetary policy, joining many other central banks around the world. Several important contributors to inflation are in the early stages of potentially peaking, contrary to a now pessimistic consensus. For instance, the broad Bloomberg Commodity Index hit a five year high in early June and has since fallen by over -15%. Recent signs of softening Russia sanctions may further ease commodity markets. Moreover, supply chain disruptions, which meaningfully contributed to recent inflation, are also showing strong signs of reversing. The Shanghai-to-LA freight benchmark, for example, has fallen by -38% since hitting an all-time high last September and just turned negative year-on-year even as channel inventory-to-sales ratios are already suggesting the potential for markdowns on 'COVID-demand-boosted' manufactured goods. In this context, five-year and ten-year 'break-even' interest rates, market-based measures of inflation expectations, peaked in the middle of the quarter and are now down about -10% since the start of this year. Similarly, widely followed economic measures such as the core-PCE deflator, the University of Michigan survey of inflation expectations, and the ISM prices paid index have all moved lower from recent peaks. Employment and housing conditions remain very tight but there have been recent hints of topping out. If inflation inputs start to cool, it will likely still take time to become visible in reported consumer prices. Additional geopolitical supply shocks are always a risk, and central banks will need to stick to the now anticipated strong tightening schedule to bring headline inflation back under control. The market is increasingly seeing hopeful signs that this now widely expected policy tightening will be effective, so long as policy makers do not waiver, improving the outlook for longer-term growth investors.

The best performing sector on a relative basis during the second quarter was communication services, led by strong performance from Baidu, followed by materials. The largest relative detractors for the quarter were consumer discretionary, due to the underweight to Chinese Internet companies, industrials, and health care.

Taiwan was the top performing country on a relative basis for the quarter, led by Far EasTone, which was buoyed by Taiwanese telecom market consolidation, followed by Hong Kong, due to high performing stock AIA Group, and lastly Thailand, driven by PTT Exploration benefitting from higher oil prices. The largest relative detractor was China, followed by India and Brazil.

From an individual stock perspective, the best relative contributors for the quarter were BYD, due to share gains in electric vehicles and batteries, Baidu, Chongqing Brewery, which benefitted from China reopening, AIA Group, and Yunnan Botanee, which continued to see brand momentum and strength in online sales. The largest detractors on a relative basis were Alibaba, due to the Strategy's underweight position, Anglo American, as a result of price correction of commodities - particularly iron ore and copper, WEG, Globant SA, and Hapvida Participacoes e Investimentos on slower than expected post-COVID recovery and higher nursing salaries.

The attractiveness of emerging markets and the risk of recession have been topics of particular interest recently. Regarding the attractiveness of emerging markets, not only are EM valuations especially low, currently trading 35% below developed market prices, but emerging market growth is poised to accelerate relative to developed markets. Key emerging markets, notably China, might be easing and/or in the earlier stages of post-COVID reopening even as many developed markets face continued policy tightening and other headwinds. The gap between developed and emerging market growth, which compressed to well under one percentage point during the past two years, is expected to reaccelerate to two and a half percentage points in the coming year, which historically has been a catalyst for EM outperformance. Any moderation in the very elevated US dollar when US interest rates peak could be a further catalyst. Turning to recession risk, the widely followed 2-10 US interest rate spreads turned negative during the second quarter, suggesting a recession within the next 6-18 months. Given the recently overstimulated economy, a policy tightening driven growth slowdown, and possible recession, would seem integral to bringing inflation back under control. While the timing of recessions is typically only clear with hindsight, the most recent data in Axiom's proprietary 'heat-map' of economic growth in over 100 countries around the world shows global growth slowing and beginning to disappoint after nearly 18 months of solid recovery. Any recession will likely be buffered by the recent strength of corporate, bank, and consumer balance sheets. Axiom's dynamic growth stocks tend to be less economically sensitive and benefit from generally high profitability, low leverage, and strong organic growth drivers helping them to outperform during economic growth slowdowns. After the sharp recent rotations, prospective growth stock valuations have returned to historically supportive levels. Investors with a longer-term horizon who agree that recent signs suggest more favorable conditions starting to emerge should consider beginning to reallocate towards public growth equities.

The information presented is not definitive investment advice, should not be relied on as such, and should not be viewed as a recommendation by Axiom. The securities presented are not representative of all of the securities purchased, sold or held for advisory clients, and it should not be assumed that investment in the securities identified was or will be profitable.

Firm compliance statement: Axiom Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to March 31, 2022. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Emerging Markets World Equity composite has had a performance examination for the periods July 1, 2014 to March 31, 2022. The verification and performance examination reports are available upon request.

Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom Investors, LLC (the "Firm") is a registered investment advisor under the Investment Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Emerging Markets World Equity strategy (the "Composite") is designed for investors who seek to invest in a broadly diversified portfolio of emerging market equities. Portfolios are invested in the full range of global emerging markets within all capitalization sizes. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional emerging markets world style fee-paying, discretionary equity accounts, regardless of asset size. The Composite was initiated and created in July 2014. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled funds and performance results are available upon request. As of September 30, 2016, the Emerging Markets All Cap strategy (the "Composite") has been renamed the Emerging Markets World Equity composite.

Benchmark Description: The benchmark is the MSCI Emerging Markets index, which is designed to measure the equity market performance in the global emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholding taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Significant Cash Flow Policy: Accounts with a cash flow greater than 20% of the portfolio market value are excluded for the month effective July 31, 2018.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends. The fee schedule for the Axiom Emerging Markets World Equity Fund, which is included in the Emerging Markets World Equity Composite is listed above. The total expense ratio as of December 31, 2020 was 0.96%.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

This may contain forward-looking statements within the meaning of the federal securities laws. Actual results could and likely will differ, sometimes materially, from those projected or anticipated.

We are not undertaking any obligation to update or revise any forward looking statements whether as a result of new information, future events or otherwise. You should not take any statements regarding past trends as a representation that trends or activities will continue in the future. Accordingly, you should not put undue reliance on these statements.

The information contained herein represents neither an offer to sell nor a solicitation of an offer to buy any securities or investment service. This strategy will only be offered through appropriate documents, copies of which may be obtained upon request from ClientRelations@axiom-investors.com. Offers will not be made in any jurisdiction in which the making of an offer or the acceptance thereof would not be in compliance with the laws of such jurisdiction. Investors should read applicable materials carefully before making a decision to invest.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be discretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willingness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investor could lose all or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy. Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
