

Global Equity Strategy

December 31, 2023

Objective

The Global Equity Strategy seeks long term compounding by focusing its investments in global developed markets and may also invest in companies located in emerging markets.

Why Invest?

- Clearly defined, transparent, and consistent process
- Driven by fundamentals, supported by evidence

- Active risk management with disciplined portfolio construction
- Advancing positive change through active engagement

Annualized Returns (%) As of 12/31/23

*Past performance is not indicative of future results, and the principal value and investment return will fluctuate, so that you may have a gain or loss when you sell your units

Commentary

During the fourth quarter 2023, the Axiom Global Equity Strategy ("Strategy") outperformed the MSCI ACWI Index ("Index") net of fees. The Strategy has outperformed the Index on a net of fees basis over the 1-year, 5-year, 10-year, and since inception periods.

Markets enter 2024 with several tailwinds. Inflation continues to moderate globally. Axiom's global inflation tracker has recovered to pre-COVID levels, having steadily improved for about 18 months. Global economic growth showed signs of stabilizing, notably at year-end, having dipped sharply during the middle of the year. As part of our ongoing portfolio monitoring, Axiom's research team fundamentally evaluated nearly 13,000 inflation and growth data points in Axware across more than 100 countries during 2023. The global easing cycle came into evidence beginning in mid-year 2023, with 48 rate cuts globally since July, exceeding the 43 hikes during that period. Just as with the tightening cycle, the easing cycle has been led by emerging markets. Currently, Fed funds futures suggest between five and six Fed rate cuts during 2024, with the first cut anticipated by late Spring. Over \$8 trillion has accumulated globally into money market funds, having nearly doubled since the start of COVID, and some of this cash will likely be redeployed into longer-term assets as rates fall. Typically, emerging markets and small caps outperform during the 12 months after the Fed starts to ease, suggesting EM and small cap recoveries might finally be within sight. Market valuations are attractive, notwithstanding last year's market recovery, with Global (MXWD), International (MXWDU), and Emerging Market (MXEF) indices all trading below 7- and 10-year average PEG ratios. Geopolitical instability remains an obvious risk with several global flashpoints as well as a number of important elections in focus this year. Longer term risks include still accelerating fiscal deficits, deglobalization, and demographic headwinds, all of which continue to favor a high quality dynamic growth approach to stock selection, as previously discussed in our 4D's Webinar, "Why the Structural Growth Market Can Continue."

Turning to quarterly attribution, the top performing sector on a relative basis was information technology, driven by ServiceNow and Gartner. In addition, the portfolio was helped by our underweight in energy and strong performance in consumer staples, led by e.l.f. Beauty and Costco. ServiceNow posted strong third quarter results with subscription revenues and current remaining performance obligation (cRPO) upside coupled with ahead-ofexpectations guidance. Gartner also posted strong 3Q results and guidance that was better than expected. After a period of moderating growth in the leading key metrics, Contract Value (CV) and indicated sales pipelines are improving, E.I.f. Beauty rallied significantly after posting another quarter of strong growth, well above expectations and raising 2023 guidance. Costco's performance has also remained resilient despite moderating trends in consumer spending habits.

The largest detracting sectors were industrials, communication services, and materials (no exposure) due to positions in Rentokil and Baidu, in which both were sold during the quarter. Rentokil reported 3Q organic growth below expectations, as the magnitude of the miss in the North American residential business caught investors by surprise. While Baidu reported 3Q results ahead of expectations, the stock continued to lag over regulatory concerns in China and continued tepid growth in their cloud computing infrastructure business. Lastly, in health care, our position in Lonza was a significant detractor from fourth quarter performance. The company held a capital markets day in which the company reset growth expectations resulting in guidance well-below consensus.

The highest contributing country on a relative basis was the US, led by ServiceNow and Gartner (mentioned above) as well as Uber. Japan also contributed positively led by Tokyo Electron, Sony, and Keyence. Uber reported better than expected bookings and profitability and posted positive GAAP net income on a Trailing Twelve Months (TTM), becoming eligible for S&P 500 index inclusion. Tokyo Electron stands to benefit from early signs of improvement and new investments in generative AI technology. Sony reported in-line fiscal 2Q results, but management commentary pointed to an outlook for improved profitability in their core Gaming services and image sensor semiconductor business in the next fiscal year. Keyence also reported fiscal 2Q results, slightly ahead of expectations with the positive surprise coming from gross and operating margin resiliency, as the global factory automation market emerges from a period of slower growth.

The largest relative detracting countries were the UK, Switzerland, and Canada. In the UK, Rentokil was the main detractor as mentioned above. Lonza, also mentioned above, was the main detractor in Switzerland, while our position in CAE detracted from our Canadian performance. CAE lowered 2023 guidance, despite posting upside in 3Q, as margins in their defense business continue to track below expectations.

From an individual stock perspective, the best relative contributors for the quarter were ServiceNow, Gartner, Amazon, Uber, and Taiwan Semiconductor Manufacturing (TSMC). The largest detractors on a relative basis were Rentokil, Baidu, Lonza Group, CAE, and Davide Campari-Milano (Campari). TSMC is witnessing improving utilization levels from generative Al-driven demand and improving trends in PC and smartphones end-markets. Campari, our Italian spirits manufacturer posted 3Q results below expectations due to weaker sell-through trends in the Americas and Southern Europe.

Axiom's Global Strategy continues to exhibit healthy dynamic growth characteristics, with forecast 2024 sales growth of approximately 14%, earnings growth of well over 25%, and ROE of about 25%, which are all well above benchmark levels and attractive relative to long-term averages. Balance sheets are strong with net debt/EBITDA and net debt/equity of 0.3 and 24% respectively, and both debt measures are low in absolute terms as well as below benchmark levels. We believe that continued strong operating performance by our portfolio investments will most likely lead to a preponderance of analyst growth forecasts for our holdings being upgraded, with both the ratio and magnitude of the earnings forecast increases tracking notably ahead of the benchmark index. Current portfolio valuation is essentially in line with benchmark levels and below the 10-year average based on PEG ratios and, therefore, seems attractive especially in the context of potentially falling interest rates and strong company fundamentals. Axiom believes that if we are successful at adding 2-4% of excess returns above benchmark, Axiom's aspirational target, mathematically we can increase investor outcomes by 20-40+% over the course of a decade and, at the high-end, which if achieved, could potentially even allow investor capital to triple rather than double over that time period. As we celebrate our 25th anniversary as a firm, Axiom believes that making a sustained investment in high quality, dynamic growth stocks continues to offer investors the opportunity for superior long-term returns.

Firm Compliance Statement: Axiom Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS[®]) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to September 30, 2023. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Global Equity composite has had a performance examination reports are available upon request.

Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom Investors, LLC (the "Firm") is a registered investment advisor under the Investment Advisers Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Global Equity strategy (the "Composite) is designed for investors who seek to invest in a broadly diversified portfolio of international equities. Portfolios are invested in companies located both in the United States and throughout the world. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional global style fee-paying, discretionary equity accounts, regardless of asset size and comingled fund(s). The Composite was initiated and created in July 2004. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled fund sand performance results are available upon request.

Benchmark Description: The benchmark is the MSCI All Country World index, which is designed to measure the equity market performance of developed and emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholdings taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Significant Cash Flow Policy: Accounts with a cash flow greater than 20% of the portfolio market value are excluded for the month through 06/30/2023. Starting July 1, 2023, the Significant Cash Flow policy is no longer in effect for the composite.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends. The fee schedule for the Axiom Global Equity Fund, which is included in the Global Equity Composite is listed above. The total expense ratio as of December 31, 2022 was 1.26%.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

Batting Average: The number of periods that the portfolio outperforms (or matches) the benchmark divided by the total number of periods.

Tracking Error: The active risk of the portfolio. It determines the standard deviation of the excess returns between the portfolio and the benchmark. It is calculated by creating a new return series of the excess returns and then calculating the population standard deviation of that return series.

Information Ratio: A measure of consistency in excess return. The annualized excess return over a benchmark divided by the annualized standard deviation (population) of excess return.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be disoretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willing-ness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investment could lose all or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy. Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
