

## Global Equity Strategy

December 31, 2024

### Objective

The Global Equity Strategy seeks long term compounding by focusing its investments in global developed markets and may also invest in companies located in emerging markets.

### Why Invest?

- Clearly defined, transparent, and consistent process
- Active risk management with disciplined portfolio construction
- Driven by fundamentals, supported by evidence
- Advancing positive change through active engagement

### Annualized Returns (%)

As of 12/31/24

\*Past performance is not indicative of future results, and the principal value and investment return will fluctuate, so that you may have a gain or loss when you sell your units

### Cumulative Returns (%)

As of 12/31/24

# Investing Ahead of the Curve

## Commentary

During the fourth quarter 2024, the Axiom Global Equity Strategy ("Strategy") outperformed the MSCI ACWI Index ("Index") net of fees. The Strategy has outperformed the Index on a net of fees basis over the 1-year, 5-year, 10-year, and since inception periods.

Axiom begins its second quarter-century having delivered strong investment returns across our platform of dynamic growth strategies and, as a result, achieving \$25 billion in assets at the start of 2025. This milestone is notable because it reinforces Axiom's ability to sustain our organizational edge by continuously adding to our capabilities across our investment, client partnership, risk management, and fiduciary teams. We have also steadily advanced our technological resources, enhancing our investment tools, including Axware, while streamlining and automating operational processes. Axiom's disciplined, forward-looking, dynamic growth approach is increasingly distinctive in today's market where over 60% of assets are passively managed and much of the remaining capital is deployed through non-fundamental quant strategies or short-term, trading-oriented approaches underscoring Axiom's differentiation and potential to add value. We believe a substantial core allocation to actively managed growth equities will continue to be foundational for achieving attractive long-term compounded returns. Given the structural tailwinds to dynamic growth equity investing (see [Axiom's 4D's presentation](#)), Axiom's sustained ability to generate significant value through agile, ahead of the curve, fact-based stock selection appears increasingly compelling. Recently we have even begun to observe large institutions reconsidering their over-commitment to private equity allocations in favor of public market growth stocks to better achieve their risk and return objectives with enhanced liquidity and transparency. Our client-aligned partnership structure and unwavering focus on investment excellence position Axiom to remain a strong partner for longer-term oriented investors seeking to capitalize on ongoing and emerging global market opportunities.

The top performing sector on a relative basis during the quarter was communication services, led by Netflix and Alphabet. Other top contributing sectors included information technology, led by Taiwan Semiconductor and NVIDIA, and consumer discretionary, led by Amazon. The only detracting sector for the quarter was industrials.

The highest contributing country on a relative basis was the US, led by Netflix, Amazon, and NVIDIA. Other top contributing countries included Taiwan, led by Taiwan Semiconductor, and Germany, led by SAP and MTU Aero Engines. The primary detracting countries for the quarter were the Netherlands, due to ASML, Denmark, due to Novo Nordisk, and Italy, due to Ferrari.

The largest stock specific relative contributors for the quarter were Netflix, Amazon, Taiwan Semiconductor, NVIDIA, and Visa. The largest detractors on a relative basis were Tesla, Danaher, Uber, MercadoLibre, and Cintas.

The investment landscape entering 2025 presents distinct challenges and opportunities, characterized by varying inflation trends across major economies, the evolving impact of emerging technologies including AI, ongoing geopolitical conflicts and trade pressures, potentially constrained U.S. labor supply, and inconsistent global monetary and fiscal policies. Aggregate global policy rate easing continues with the cuts-to-hikes ratio now exceeding 5-to-1, which remains a tailwind for our dynamic growth stocks. Other current macro dynamics that we are closely monitoring include movements in yield-curves and the potential impact of U.S. Treasury market shifts, credit conditions around the world, importantly including the potential impact of Chinese fiscal policy and, in general, the interplay between GDP growth and inflation in key markets globally. These complex macro conditions continue to create opportunities for our nimble, fact-based, dynamic growth stock selection approach. The intensifying forces of the '4D's', demographics, deglobalization, and debt accumulation combined with accelerating technological disruption are shaping market leadership and contributing to the 'winner-takes-all' dominance of an ever-evolving subset of well-positioned market leaders globally. Axiom's holistic, active fundamental assessment of risk and opportunity remains key to navigating market volatility to achieve the attractive longer-term compounded return potential. Our portfolios remain well-positioned in a diverse array of market leading companies across a variety of sectors, countries, and capitalizations all demonstrating superior growth and returns, appropriate valuation, and benefiting from fundamental accelerations in evidence in their core operations.

The information presented is not definitive investment advice, should not be relied on as such, and should not be viewed as a recommendation by Axiom. The securities presented are not representative of all of the securities purchased, sold or held for advisory clients, and it should not be assumed that investment in the securities identified was or will be profitable.

Firm Compliance Statement: Axiom Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to December 31, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Global Equity composite has had a performance examination for the periods July 1, 2004 to December 31, 2024. The verification and performance examination reports are available upon request.

Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom Investors, LLC (the "Firm") is a registered investment advisor under the Investment Advisers Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Global Equity strategy (the "Composite") is designed for investors who seek to invest in a broadly diversified portfolio of international equities. Portfolios are invested in companies located both in the United States and throughout the world. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional global style fee-paying, discretionary equity accounts, regardless of asset size and commingled fund(s). The Composite was initiated and created in July 2004. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled funds and performance results are available upon request.

Benchmark Description: The benchmark is the MSCI All Country World index, which is designed to measure the equity market performance of developed and emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholdings taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Significant Cash Flow Policy: Accounts with a cash flow greater than 20% of the portfolio market value are excluded for the month through 06/30/2023. Starting July 1, 2023, the Significant Cash Flow policy is no longer in effect for the composite.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period.

Batting Average: The number of periods that the portfolio outperforms (or matches) the benchmark divided by the total number of periods.

Tracking Error: The active risk of the portfolio. It determines the standard deviation of the excess returns between the portfolio and the benchmark. It is calculated by creating a new return series of the excess returns and then calculating the population standard deviation of that return series.

Information Ratio: A measure of consistency in excess return. The annualized excess return over a benchmark divided by the annualized standard deviation (population) of excess return.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

This may contain forward-looking statements within the meaning of the federal securities laws. Actual results could and likely will differ, sometimes materially, from those projected or anticipated.

We are not undertaking any obligation to update or revise any forward looking statements whether as a result of new information, future events or otherwise. You should not take any statements

regarding past trends as a representation that trends or activities will continue in the future. Accordingly, you should not put undue reliance on these statements.

The information contained herein represents neither an offer to sell nor a solicitation of an offer to buy any securities or investment service. This strategy will only be offered through appropriate documents, copies of which may be obtained upon request from InvestorServices@axiom-investors.com. Offers will not be made in any jurisdiction in which the making of an offer or the acceptance thereof would not be in compliance with the laws of such jurisdiction. Investors should read applicable materials carefully before making a decision to invest.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be discretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willingness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investor could lose all or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy. Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
