What is this product?

Type

This product is a UCITS Investment Fund.

Term

This product has no fixed end date. However the Sub-Fund, at its absolute discretion, can redeem all the shares of the Sub-Fund under the circumstances set out in the prospectus.

Objectives

To seek long term growth of capital.

Investment Policy

Strategy The Sub-Fund pursues an actively managed concentrated strategy that seeks to provide exposure to equity securities of companies in Emerging Markets globally. The Sub-Fund does not focus on any specific industrial sectors but rather pursues a policy of active security selection in the markets in which it operates.

To implement this strategy, the Investment Manager appoints the Sub-Investment Manager who constructs a portfolio considering various factors and actively selects securities in order to seek to identify companies with strong growth potential that are undergoing significant change in emerging markets.

Sustainability approach The environmental and social characteristics of the Sub-Fund are to invest in companies that are deemed positive ESG contributors using the Sub-Investment Managers' proprietary analysis of companies' ESG performance (Proprietary Structural Factors Ratings) and third party ESG ratings of companies' exposure to and management of ESG risks and opportunities.

The Sub-Fund will invest at least 10% in sustainable investments.

Benchmark(s) MSCI Emerging Markets Net Tax Total Return Index (USD), unhedged (the "Benchmark"). The Benchmark is used as an outperformance target. The Benchmark is a free float-adjusted market capitalisation index that is designed to capture large and mid-cap equity market performance across emerging markets.

The Sub-Fund seeks to outperform the Benchmark by 2% - 4% gross of fees, on average over the medium to long term.

The Sub-Fund does not intend to track the Benchmark and can invest in securities that are not included in the Benchmark. Under normal market conditions, the ex-post tracking error is expected to range between 3% and 5% over the medium to long term (indicative only).

Investments The Sub-Fund invests primarily in Emerging Markets equity securities.

The Sub-Fund may invest in assets denominated in any currency and currency exposure is usually unhedged. However, the Sub-Investment Manager is permitted to hedge any currency exposures at its discretion.

Derivatives The Sub-Fund may use Derivatives for efficient portfolio management to reduce risks (hedging), to reduce costs or to seek additional capital or income in line with its risk profile.

Base currency USD.
